BAMBOO STEAMER

Bamboo material, durable, water resistant,easy to clean
Bamboo steamers absorb the excess moisture which in turn prevent condensation from dripping on the food.
Convenient, practical and necessary for home.
Great for dim sum, dumpling, veggies, steamed buns and other food.
Healthy cooking a great variety of foods: vegetables, meats and fish. Cuts down fats and grease.

COFFEE PROBE THERMOMETER

304 stainless steel
Instantly reads the temperature of frothed milk, hot beverages, or even melted chocolate
This thermometer is designed with a superior grade 3 point calibration system. A recalibration nut under the dial allows you to keep the thermometer accurate in the field.
Accuracy of +/- 2 degrees Fahrenheit

Item No	Description	Size	Temperature	MOQ
CTC-45	Coffee Probe Thermometer	Φ45mm, 127mm	0°C~100°C	500
CTC-32	Coffee Probe Thermometer	Φ35mm, 210mm	0°C~100°C	500
CTC-26	Coffee Probe Thermometer	Φ26mm, 127mm	0°C~100°C	500

THERMOMETER

Stainless steel housing adds durability; Operates in Fahrenheit or Celsius mode;
Sturdy base allows for standing use

CUTLERY

Our dinner and steak knives are made of durable quality stainless steel for a sharper blade and enhanced cutting experience.
Our forks and spoons are made of 304 stainless steel
Our cutlery exhibits a focus on designs that embrace both traditional and contemporary styles.
Choosing the best flatware depends on your budget and how casual or upscale your eatery may be. The best options are medium-weight flatware for the lowest prices, heavy-weight for a sturdier feel and mid-range price point.

Collette Porcelain

China

Collette Porcelain

Collette Porcelain offers a wide range of high quality white porcelain tableware at an absolutely reasonable price.

Our products will meet the requirements of an exacting restaurateur, whilst also being of interest to customers for daily home use.

The fabrication of our porcelain is done at a very high temperature, creating a hard and dense product with a bright and shiny glaze. This process also ensures that the water absorption of the porcelain is very low.

With a sheet-like structure, Collette Porcelain boasts a high brightness, high strength, good transmittance, a high thermal stability and many other prominent features.

Collette porcelain's main feature is its durability, meant for constant heavy use, and can be placed into a dishwasher or a microwave oven without worry.

Melamine Deli Display

Melamine dinnerware is a great choice for those looking for an inexpensive,yet incredibly durable dishware for the kitchen.Its benefits include:

Shatter and Break Resistance
Due to the chemical composition of melamine, melamine products are virtually indestructible.

Scratch Resistance
Whilst being almost unbreakable,melamine is also highly resistant to scratching from general use,whether it be subjected to the constant use of forks or knives.

Lightweight and convenient
Melamie is much lighter than its ceramic and porcelain counterparts,- making it much easier to handle around the kitchen.

Stainless Steel Table Stand Signs

Made from polished stainless steel, this table number stand is ideal for holding cards of any signage, from numbers to receipts. Its long, thin neck is eye-catching and sturdy. As an added convenience, a simple wipe down with a wet cloth will clean grime and restore shine! The table number stand's timeless design is suitable for catering events, restaurant chains and cafes.

Storage Barrel

PC & PE materials are available in round or square. Perfect storage for raw, prepared and cooked food. Refrigeration allowed.

Wide and Easy Grip Handle
Comfortable handles with drain holes for quicker drying.

Capacity Mark
Litre and Quart were marked around the barrel for capacity control.

Stacking Lugs
Unique reinforced stacking lugs on all four corners add strength, rigidity, and help prevent container “lock-up” or jamming when stacked together.

White

Red

Blue

Green

Textured Lid
Nice texturing on the lid increases security of stacking in some extent.

Display Box

To comply with the food processing procedures specified by HACCP food safety control mechanism, our products are characterized by the following:

1. A color coding system applied to food containers to specify the days of week;
2. Slots suitable for inserting colored labels on both sides of the display box;
3. When closing the container, the lid covers the label slots addressed above, to protect the contents from humidity and grease stains.

Pizza Dough Box

Features:

The product is most suitable for storage, transport and cooling the dough.

Light weight, durable and a structure that prevents breakage.

With a high chemical resistance, it does not absorb odours and is easy to clean.

The box body closely stacked together, shielding the contents from dust and pollutants, prolonging their freshness.

Dough storage box can be used as a fastening cover above below the dough storage box lid, thereby reducing the demand and cost.

Can withstand temperature from -40°C to 70°C.

The lid can be used as a disk.

Plastic(Epoxy) Shelving System

- High density systems may eliminate channels to utilize all the available space.
- Increases storage capacity up to 30%-40% .
- The most suitable for the use of limited storage space.
- Weight bearing capacity of High Density Move Unit is 340kg.

The track simply connects to the bottom of stationary shelving, no bolts or drilling into the floor are required. Using the connect bolt to fasten the track.

Track Kit

Raised track provides a smooth and level surface to easily roll mobile units. It ensures dirt will not get trapped, and is easy to clean. Move unit with heavy weight loads roll smoothly on track.

High Density Caster

Grooved casters roll easily on raised track, can be used on any surface. The caster with bumper can protect itself.

Corner Connector

Use set of corner connectors on each shelf to attach an add-on unit to a basic unit to form a 90° angle. The traverses snap onto the dovetail on the corner connectors just like they snap onto the dovetails on the posts.

Basic Unit

Through combination of various specifications based on aircraft, and then through the combination of the basic unified body of the aircraft. Environment-friendly shelf components can be formed.

Pole 2

Shelf 3

Stationary Post Kits And Accessories

When adding on to a basic unit, the traverses on the first and second unit share the middle post. As a result, only two additional posts, instead of four posts.

Glass Racks

The racks fit through any commercial dishwasher. Seven different rack specifications are available. The rack is the perfect tool for holding large plates during washing cycles.

Open Inside Compartments

Particular wave patterns and open inside compartments ensure thorough washing, and advance air circling to dry inside faster.

Comfortable Handling

Easy-to-grip. Tough handles with texturing on four sides provide comfortable handling.

Steady Construction

Clever structure design bring extra convenience of packing and stacking.

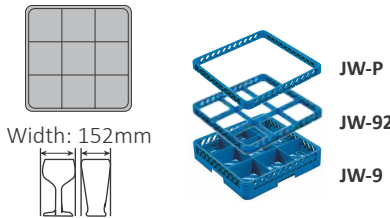

Firmly Lock

The well cutting snap-fit could lock the layers firmly. More safety for shipping and stacking.

Multifunctional Burnisher

High speed polisher is designed by manual controlling. It is characteristic of its big power, quickness and effectiveness. It is very easy to operate, polishing at speed of 1500 RPM. Two capacitors and a built-in fan cooling motor with great power are installed inside the machine. It is adjustable to all kinds of floors and bricks, especially suitable for polishing the wax floor. The operation system enables it to move in all directions. The machine can move with freedom for a perfectly spotless floor and it offers longer wear and lower maintenance, while achieving a high gloss surface.
